

Description

The ESD -192 Combo Tester verifies the functionality of an operator's wrist strap and footwear (footwear test requires foot plate). It determines if an operator's wrist strap and footwear will function correctly. A rocker switch allows the operator to select a wrist strap or footwear test. A green light indicates that the wrist strap or footwear is passing. Red and yellow lights plus an audible alarm indicates when the wrist strap or footwear is failing. If failure occurs, the tester will also display if the grounding device's resistance is too low or too high. The Combo Tester may also be used to test smocks or garments that feature a grounding mechanism for operators using a coiled cord connection.

- **Tests Operator's Path-To-Ground; Wrist Strap limits 750 kilohms to 10 megohms; Footwear limits 750 kilohms to 100 megohms***
Determines that operator's personal grounding device** is functioning correctly.
- **Separate Test Circuits for Wrist Straps and Foot Grounders**
Rocker switch allows operator to quickly test all personal grounding devices.
- **NEW Durable, Stainless Steel Test Button**
Long lasting; reduces wear and tear
- **9 Volt Battery Power or Optional 120/220 AC Adapter**
Footplate (Included) or Stand (Not Included)
Combine tester with footplate or stand to test foot grounders
- **NIST Calibrated with Certificate Included**
Calibrated with accepted procedures and standards traceable to the National Institute of Standards and
Made in the United States of America
